3. Call Handling Procedures

1. **Greeting**
   - Start the call or the conversation with a positive and clear tone:

   "Thank you for calling Rcell customer service, my name is [your name], how can I help you today?"

2. **Problem Identification**
   - Use open-ended questions like:
     1. "Can you please explain the issue you're facing in more detail?, so I can help you better Sir"
   - Summarize the issue to confirm understanding by saying .
     1. "ok if I understand you correctly you are facing a problem with your (account) and you have forgotten you password?, is that correct."
     2. "If I understood correctly, you have a problem with your voucher card and it is not registering on selfcare?, is that correct. "

   in order to understand the problem and ensure clearer communication between you and the customer and confirm the customer's satisfaction.

3. **Customer Verification**
   - Ask for at least two identifiers: full name, registered phone number, national ID, or account number.
   - The Identification can be :
     1. National ID
     2. Passport
     3. phone number
     4. Full name (fist, middle , last)
   - If identity is verified, proceed. If not, politely decline to disclose sensitive information by saying.
     1. "dear customers in order for use to process your request we need to identify your information if you are not going to provide we cannot provide the necessary support"

4. **Solution Implementation**
   - Use available tools and scripts to resolve the issue.
   - If resolution is not possible, explain the next steps and expected resolution time.

draft

5. **Closure**
   - Ask if the customer has any other questions.
   - Thank them for contacting you by saying:

     "Thank you for contacting you us, you don't have any other issues or questions we can help you with?"

     If not then you can say goodbye and hangup the call, if they had other questions proses it using the point mentioned before.
